

All About Transfers

The Transfer Process

If both the student's previous and new establishment uses CPOMS, once the student officially leaves/ moves establishment and their UPN or ULN is added **identically** at both establishments (*within the MIS > CPOMS*), the transfer between CPOMS will be detected automatically. (*Assuming the student has incidents logged against them*)

Once detected, the new establishment will receive a notification to '**Request**' the transfer at their side, within their CPOMS 'Admin' area > 'Transfers' tab.

On request, the previous establishment will receive a similar notification, this time to '**Authorise**' the transfer at their side, again within the 'Admin' area > 'Transfers' tab.

The screenshot shows the CPOMS Admin interface. The 'Transfers' tab is selected in the top navigation bar. Below the navigation bar, there is a 'Bulk Management' section and a 'Transfers' section. The 'Transfers' section contains a 'Manage Categories' button, which is highlighted with a red dashed box. Below this button, there is a search bar and a table of transfer requests. The table has columns for Name, School, Matching field, Matching value, Status, and Direction. Each row has a 'Request transfer' button and a 'DISMISS' button, which are also highlighted with a red dashed box.

Name (Name at other estab.)	School	Matching field	Matching value	Status	Direction
<input type="checkbox"/> Stephanie Kennedy (Stephanie Kennedy)	Demo test system	UPN	J207000018067	Pending	incoming
<input type="checkbox"/> Ethan Ross (Ethan Ross)	Demo test system	UPN	V207000019038	Pending	incoming
<input type="checkbox"/> Navami Kapadia (Navami Kapadia)	Demo test system	UPN	Q207000018594	Transferred on Tue, 10 Oct 2023 11:43:00 +0100	incoming
<input type="checkbox"/> Peter Kelly (Peter Kellies)	Demo test system	UPN	W207000018001	Pending	incoming

Before you authorise any Transfers for students leaving your establishment, please make sure you have double checked your 'Manage Categories', within the CPOMS 'Admin' area > 'Transfers' tab.

By default, categories will not be selected, therefore it is imperative that you choose which categories of incidents/ actions you wish to transfer to the new establishment.

Once the previous establishment clicks to authorise, the new establishment will receive the student's incident history, and any attached documentation/ files within their document vault.

Transfer Preferences – Manage Categories

Using the 'Manage Categories' button below you can control which categories of information are transferred.

For any incident to be transferred, at least one of the categories assigned to it will need to be designated as transferable in your settings. Transfers happen according to the settings at the time the transfer is authorised, so it's important you review these settings before authorising any transfers.

 Manage Categories

Each establishment must apply their own preferences so that only certain categories are transferred. This can be set by a CPOMS **Admin Key Holder** within the establishment's '**Admin**' area > '**Transfers**' tab, by

clicking on the '' button. Simply tick the categories that you would like to transfer and choose to '**Update Categories**'.

Please be aware, when you add new categories to the system you will need to check and update your transfer 'Manage Categories' to include the new category(s) in future transfers should you wish to.

*If you do not tick any categories within your '**Manage Categories**' section, and click to authorise a transfer in CPOMS, the receiving establishment will not receive any incidents relating to the student.*

Once a transfer has been sent/ authorised it cannot be re-tracked or re-sent.

What information is transferred via CPOMS?

Once a transfer has been requested by the student's new establishment and authorised by their previous establishment, the student's incident history, plus any files/ documentation within their document vault will be sent across to the new establishment's CPOMS system. *This will be the incidents/ actions assigned to the establishment's chosen categories in their own 'Manage Categories'.*

Any linked student names, to the left of the incident text, will be hidden.

The name of the staff member who logged the incident, to the left of the incident text, will change to the previous establishment's name (i.e. the school name who authorised the transfer).

The incident text will send on (transfer) exactly as it is written.

Before authorising a transfer, we would always suggest that you double check the students 'Incidents' tab and document vault to ensure that all required names are removed from the text. If you do then find a name that you need to alter you can choose to 'Edit' the text of the incident to use initials for any names or use a different term such as mum/ dad/ brother/ sister, for example. If this is required by your internal procedures.

Once you are happy with the incident text and documentation you may click to authorise the transfer.

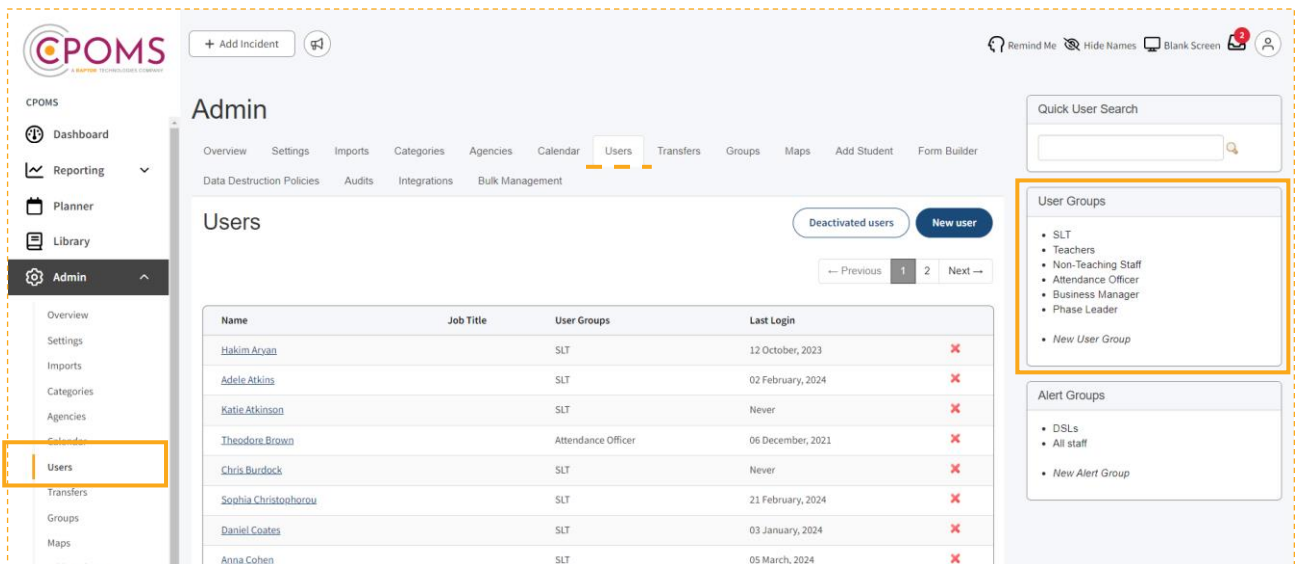

How to access the transfer information

Once the transfer status changes to 'Transferred', the new establishment will receive the student's transfer information.

The establishment's/ student's previous incident categories are brought across to CPOMS also, under a main category of 'Legacy', with sub-categories of the previous establishment's category names.

The Legacy categories are automatically deactivated, and the permissions are set to blank, to ensure that no new incidents can be logged against them and that only the correct level of staff at the new establishment can access the transferred information.

Therefore, in order to gain access to the transferred information, a CPOMS **Admin Key Holder** needs to set the permissions for each Legacy category, and any sub-categories within the 'Admin' area > 'Users' tab, by clicking into the top-level User Group name, *i.e.* SLT, to the right-hand side of this page.

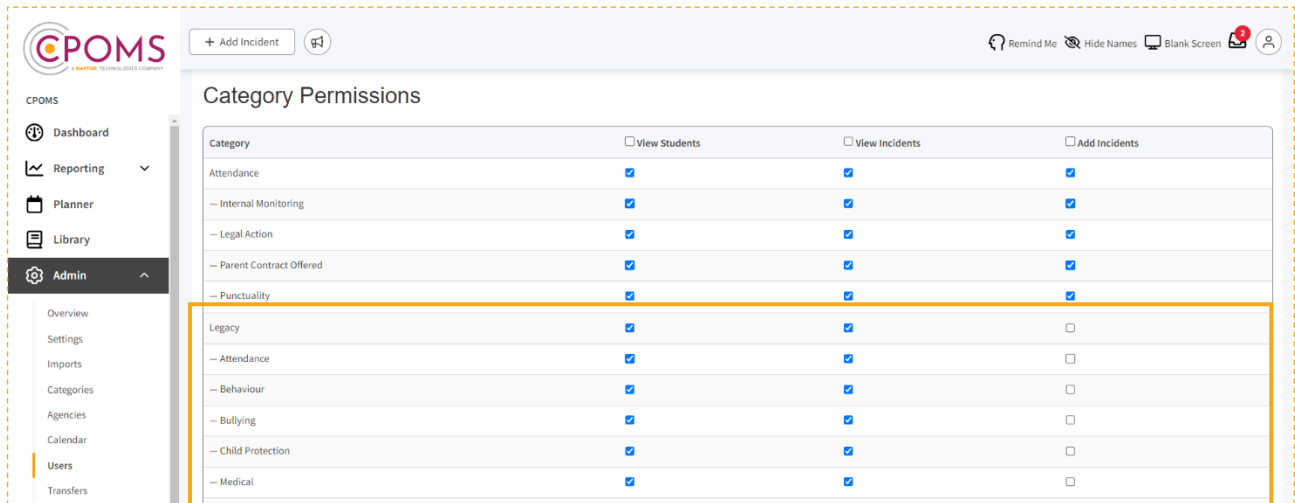

The screenshot displays the CPOMS Admin interface. The 'Users' tab is active, showing a list of users. The 'Users' menu item in the left sidebar is highlighted. On the right, the 'User Groups' and 'Alert Groups' panels are highlighted. The 'User Groups' panel lists SLT, Teachers, Non-Teaching Staff, Attendance Officer, Business Manager, Phase Leader, and New User Group. The 'Alert Groups' panel lists DSLs, All staff, and New Alert Group.

Name	Job Title	User Groups	Last Login
Hakim Arvan		SLT	12 October, 2023
Adele Atkins		SLT	02 February, 2024
Katie Atkinson		SLT	Never
Theodore Brown	Attendance Officer		06 December, 2021
Chris Burdock		SLT	Never
Sophia Christophorou		SLT	21 February, 2024
Daniel Coates		SLT	03 January, 2024
Anna Cohen		SLT	05 March, 2024

Within the User Group 'Category Permissions' please tick 'View Students' and 'View Incidents' against each Legacy category and any sub-categories, ensuring you 'Save Group' once ticked.

Please leave the 'Add Incidents' column **un-ticked** so no new incidents can be logged against them.

Category	<input type="checkbox"/> View Students	<input type="checkbox"/> View Incidents	<input type="checkbox"/> Add Incidents
Attendance	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
– Internal Monitoring	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
– Legal Action	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
– Parent Contract Offered	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
– Punctuality	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Legacy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
– Attendance	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
– Behaviour	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
– Bullying	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
– Child Protection	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
– Medical	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Once the category permissions have been switched on, the transferred information will appear within the student's profile > 'Incidents' tab in date order, and any files within their 'Document Vault' tab.

A transfer is not showing for me to request/ authorise?

For a transfer to be detected in CPOMS:-

- **There must be a matching value on both CPOMS systems.**

CPOMS currently supports UPNs and ULNs, so either of these values must be the same on both CPOMS systems. Please ensure this by looking at the student's CPOMS record > 'Overview' tab.

- **The previous establishment must have the student archived in their CPOMS system.**

CPOMS student archiving will take place once the MIS imports detect that the student has left the previous establishment. To check this in CPOMS, simply search for the child, choosing to 'Include archived students'.

- **The receiving establishment must have the student active in their CPOMS.**

CPOMS will import the student from the MIS once their start date is reached. Simply search for the child within CPOMS, to ensure they have imported (with a matching value as above).

- **The UPN must not be a temporary UPN.**

CPOMS will not detect a transfer using a temporary UPN as the matching value. Temporary UPNs usually have a letter at the end, typically an 'A'.

- **The previous establishment must have incidents and/or documents related to the student in their CPOMS.**

CPOMS student transfers do not detect if there is no information to transfer. The previous establishment can take a glance at the student's CPOMS record to see if there is any information present.

Please note, the new establishment must firstly request the transfer to start the process.

Transfer Status

When a transfer appears within the Admin > Transfers section, it will have a 'Status' so you can easily see which stage it is at in the transfer process:-

Status	Definition
Pending	The transfer has been detected on both establishment's CPOMS systems. Ready for 'New' ('Incoming') establishment to click 'Request'.
Rejected	'New' establishment requested transfer information, 'Previous' establishment chose to 'Reject' the request. Check with the other establishment for reason why it was rejected.
Dismissed	'New' establishment does not want to receive the transfer information. This may be because the child did not eventually go to that establishment.
Requested	Awaiting 'Previous' ('Outgoing') establishment to click 'Authorise'.
Transferred	The transfer has been requested and authorised by both establishments, and the information has been transferred to the 'New' establishment's CPOMS system. Please see page 3, How to access the transfer information if you are unsure how to view it.
Obsolete	The student is archived on both 'Previous' and 'New' establishment's CPOMS system. No action available.

Transfer Direction

Each transfer will also have a 'Direction':-

Direction	Definition
Incoming	The establishment with the direction 'Incoming' will receive the transfer information. They are the child's 'New' establishment.
Outgoing	The establishment with the direction 'Outgoing' will transfer their CPOMS information, <i>for that student</i> , to the 'New' establishment. They are the child's 'Previous' establishment.

The new setting does not use CPOMS?

If a student's new establishment does not use CPOMS, you can run a full student report in CPOMS, and either print a hard copy, or send on electronically.

Please see below instructions to run a full student report:-

- ③ Access the student's profile via their class list, or using the 'Quick Student Search' option and click on their name, into their profile.
- ③ Within the student's profile, click on the '**Student Report**' tab.
- ③ Under '**Include in report**' tick to include '**Incidents**' in addition.
- ③ In the additional '**Filter Incident**' options that now appear, you may wish to tick '**Include Linked Incidents**' to ensure you receive any incidents the student has been linked in to also. You may also wish to choose to **Hide Student and/ or Staff Names** in the report.
- ③ *For all records please ignore the further filter options, or you may apply specific dates or select certain categories within the 'Filter incidents' options.*
- ③ Scroll down to the '**Report format**' and amend this to '**PDF (print view)**'.
- ③ If required enter a '**PDF password**' to password protect the report, and '**Generate Report**'.

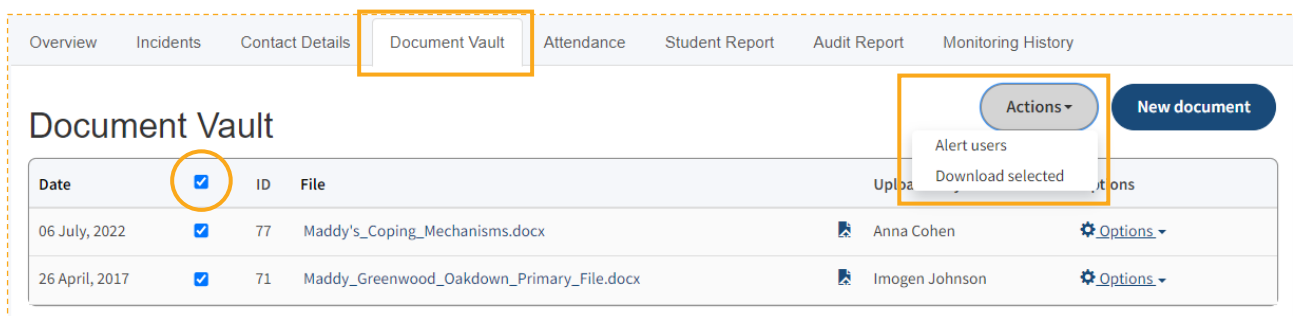

This will then generate a PDF copy of the student's incidents which you can then print or save electronically.

How do I download the student's documents/ files?

Once you have run the student report, you may wish to download the student's documents/ files as well.

To do this, access the student's profile via their class list, or using the 'Quick Student Search' option and click on their name. Within their profile, click on the '**Document Vault**' tab.

To download all, click on the very top tick box (*In between the titles 'Date' and 'ID'*) which will select all, *or if you do not wish to download all simply tick the documents you require one by one*. A new button for '**Actions**' will now appear to the right-hand side of the screen. Click on this option and '**Download selected**'.

Date	<input checked="" type="checkbox"/>	ID	File	Upload	Download	Options
06 July, 2022	<input checked="" type="checkbox"/>	77	Maddy's_Coping_Mechanisms.docx		Anna Cohen	Options ▾
26 April, 2017	<input checked="" type="checkbox"/>	71	Maddy_Greenwood_Oakdown_Primary_File.docx		Imogen Johnson	Options ▾

This will create a zip file containing all of the selected documents. The zip file usually appears to the bottom left of your internet browser for quick access and is usually saved in the 'Downloads' folder of the machine you are on (depending on your individual machine settings).

Please note, if the student has multiple pages of documents, you will need to follow the above instructions on each individual page.

Hiding Names in a Student Report

When you are running the report, in the 'Incident Filters' you will find the option to 'Hide' either Student Names or Staff Names (or both).

When you select to hide Student Names, you can choose to hide 'All' names, or 'Just Linked' names only. If you choose to hide 'All' names, the name of the student whom the report is written about will be hidden, as well as any linked students. If you choose to hide 'Just Linked' names, the name of the student whom the report is written about will not be hidden.

*Please note, the system is only able to hide the first name, surname (or both) of the student for whom the report is written and any other students who are linked into the incident, as long as it is spelt identically to how it is registered in your MIS. It will **not** hide shortened/ mis-spelled versions of the names if used, or the names of any other students who are not linked into the incident.*

When you select to hide Staff Names, the name of the staff member who wrote the report will be hidden to the left-hand side of each incident, as well as the name of the staff member it is 'Assigned to'.

We would always suggest that before you print out a report, that you first run it in the report format 'Enquiry View' to check that all the required names are removed from the text. Once you are happy with it, you can then run it as a 'PDF (Print View)'. If you then find a name in a report that you wish to hide, you can either link in the required student(s) or edit the text of the incident/ action to use initials instead, *for any names that cannot be linked*, and re-run the report. If this is required by your internal procedures.

If there is a particular name or initials you wish to redact from a report as a one off, you can enter this in the 'Redact words or phrases' option before generating the report, which will redact it from the report you are generating. Simply type in the name/ initials and select it to add, you may add more than one word/ phrase.

For further assistance on any of the above please do not hesitate to contact us on

01756 797766 or support@cpoms.co.uk.
