# CPOMS Engage™ for Schools

**Simplify the sharing of sensitive pupil chronologies across settings**

### What is it?

CPOMS Engage gives you the power to collaborate seamlessly across settings in support of pupil wellbeing.

Safeguarding, Child Protection, pastoral and welfare information can be shared across settings via a CPOMS Share Contract. Share Contracts are set up through CPOMS and sent to the desired school where a pupil is on roll. This is especially helpful when a child attends multiple schools.

### Why is it Important?

CPOMS Engage creates a way of sharing chronologies and provides you with accountability. Within your setting, you can see who has sent what information, when, who's picked it up and who's acting on it. You will be able to identify where interventions need to take place and can send information back to the school about actions that have been taken, along with a summary.

## Highlights

### For Pupil Referral Units

CPOMS Engage helps PRUs receive critical data from the referring establishment regarding the pupil's background, including attainment, attendance and the pupil's behavioural, emotional and social needs.

CPOMS Engage also helps PRUs share information with the referring institution in an ongoing fashion. This can help with reintegration planning and success.

### For Multi-academy Trusts

With CPOMS Engage at the Trust, academy schools can seamlessly share data with the central safeguarding team for a collaborative approach toward pupil wellbeing.

## Key Features

### Secure Share Contracts
Share Contracts are set up within CPOMS Engage and are configurable to your preferences including frequency, type of data to be shared and who should have access to the information.

### Domestic Violence Notifications
Local Authorities can provide direct visibility of domestic abuse incidents received from Police. Entered at the Local Authority, the Domestic Violence Notifications become available immediately to your school.

### Powerful Reporting
Build reports on any data point to identify trends, resource gaps, or needs analysis, and easily create summary numbers for compliance requirements.

### Simplify Safeguarding Processes
CPOMS Engage eliminates the need to reformat files, send secure emails and make countless phone calls. The data you specify is shared securely reducing administrative duties and enhancing safeguarding duties.

### Maximise Resources
When it's easier to share information with Local Authorities, Trusts, PRUs and other agencies, you can focus on putting the expertise and talents of your staff to good use for the benefit of the child.

## About Us
Used by more than 18,500 Establishments in 68 countries **globally**, CPOMS is the market-leading software for monitoring Safeguarding, wellbeing and all pastoral issues.

*"CPOMS Engage has been an absolute game-changer for us and has strengthened our Child Protection and Safeguarding processes with the mainstream schools who refer to us. It allows us to have an instant overview of a student who is joining our provision and means that we have a live chronology that better supports the students and means key staff have a better understanding of the needs and history."*
