

CPOMS Engage™ for Local Authorities

**Collaborate Seamlessly Across Settings
in Support of Pupil Wellbeing**

What is it?

CPOMS Engage simplifies the sharing of sensitive pupil chronologies across your Local Authority and enhances your safeguarding processes.

Safeguarding, child protection, pastoral and welfare information can be shared across settings via a CPOMS Share Contract. Share Contracts are set up through CPOMS and sent to the desired school where a pupil is on roll. This is especially helpful when a child attends multiple schools or is referred to teams such as Social care, a virtual school, children missing in education (CME), elective home education (EHE), or work-related learning.

Why is it Important?

CPOMS Engage creates a way of sharing chronologies and provides you with accountability. Using the audits and case management functionality in CPOMS you can see who has been alerted and assigned to a case in your setting, and how the concern is being managed.

Highlights

Remove Information Silos

The CPOMS Share Contract removes the complexity of sharing sensitive pupil data so authorised staff can easily view a more complete picture of a child's wellbeing.

Collaborate Across Settings

More readily connect the dots on a situation and address pupil concerns before they become significant problems.

Maximise Your Resources

Truly leverage a multi-agency approach where information is readily shared, and expertise and talents are put to good use for the benefit of the child.

Key Features

Multi-agency Safeguarding Teams

Increase the security and timely delivery of urgent Domestic Abuse Notifications between Police, Social Workers and Headteachers and get straight to helping the child. CPOMS Engage provides a secure, instant transfer of information directly into a pupil's chronology.

Virtual Schools

Save time and resources by eliminating the need for secure emails and phone calls when CPOMS Engage can automatically alert the Virtual Headteacher who can monitor vulnerable children remotely.

CME and EHE

Enrol Children Missing in Education (CME) onto the software and track if a transfer request comes in from another CPOMS school, anywhere in the country. Easily gather and collate information on students who have recently been added to the Elected Home Education (EHE) list.

Integrated Front Door/MASH/MAST

Enable teams to focus on integrated front-door service cases rather than locating information. CPOMS Engage puts critical information at your fingertips, so you can attend to the needs of the child.

Social Care/Early Help

Readily obtain school data on child protection or other vulnerable students including progress updates on Early Help Referrals. CPOMS Engage removes the hardships of gathering this information so you can focus on the student.

Work-related Learning

Enhance the collaboration between the WRL team and the alternative settings where a young person attends.

About Us

Used by more than 17,500 establishments, CPOMS is the market-leading software for monitoring safeguarding, wellbeing and all pastoral issues.
