

CPOMS STAFFSAFE

Simplifies the recording and reporting of welfare information of school personnel

What is it?

CPOMS StaffSafe is an easy-to-use software tool that provides a way for users to effortlessly input, document, and manage information related to staff members within their school system or other setting. StaffSafe takes the manual frustrations of submitting, tracking, and reporting confidential staff notes. StaffSafe's customised reports can be tailored to the specific priorities of each setting and organised for an instant overview or a comprehensive examination.

Why is it Important?

With CPOMS StaffSafe, administrators can be confident that they will be SCR compliant and that all the information is stored in a secure, centralised database. Existing SCR data can be automatically transferred into StaffSafe improving compliance, and data accuracy while decreasing strain on staff. StaffSafe provides administrators with instant visibility of a staff member's chronology to help identify any behavioural patterns as well as upcoming renewal certifications or checks.

Highlights

Streamlined Process

Drastically simplify information documentation, tracking, and recognising staff behaviour patterns. Not only improving governance reporting but also freeing up staff to focus on what is most important.

Eliminate Manual Reporting

With data stored in a centralised database administrators can accurately, easily, and quickly run customised reports allowing them to gather the information they need, when they need it most.

Key Features

SCR Compliance

Administrators no longer need to manually organize, track, and update databases for all staff-related records. Current SCR data can be transferred into StaffSafe for streamlined data reconciliation.

Confidential Notes Capture

CPOMS StaffSafe software provides a secure environment to document any low-level concerns about staff as outlined in Keeping Children Safe in Education (KCSIE).

Chronologies Builder

StaffSafe automatically builds a chronology of any staff member, allowing for instant reporting on topics such as welfare concerns, allegations, and general comments. Schools can add or remove as many categories as they see as the best fit for their use cases.

Customisable

StaffSafe allows schools and other settings to configure the tool in a way that best fits their unique needs. Ranging from different roles, permissions, check types, categories of concern, input forms, and alerts.

Follow-Up Reminders

Automated reminders notify the appropriate administrators of expiring checks that require follow-up.

Reporting

Filter and sort data for a quick overview or a comprehensive look across various criteria.

Role-based Access

The customisable access levels assure school leaders that they can consolidate both SCR and confidential notes in one location while providing authorised staff members access to the specific sections of the system required for their roles.

User Action Auditing

All user interactions are date- and time-stamped which makes user action auditing accurate and seamless.

About Us

Used by more than 18,500 Establishments in 68 countries **globally**, CPOMS is the market-leading software for monitoring Safeguarding, wellbeing and all pastoral issues.

"Saves so much on paper and allows you to organise the roles and responsibilities within your school to check for compliance. It has streamlined our staff records."
